

OMKAR DATE

Python Developer

Phone: 8956784682 | Email: omkardate69589@gmail.com | [LinkedIn: OmkarDate](#) | [GitHub: Omkar4682](#)

PROFESSIONAL SUMMARY

Python Developer skilled in Django, DRF, and MySQL, with hands-on experience building secure, role-based web applications like Nova Banking System, and working knowledge of data-handling libraries such as NumPy, Pandas, and Matplotlib. Trained via Naresh i Technologies' 5-month Full Stack program and Deloitte's Python simulation. Strong in REST APIs, database design, and backend security.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Frameworks & Libraries:** Django, Django REST Framework (DRF), NumPy, Pandas, Matplotlib
- **Databases:** MySQL
- **API Development:** REST API, Postman (API testing & documentation)
- **Frontend Basics:** HTML, CSS, JavaScript
- **Cloud:** AWS (Basics)
- **Tools & Practices:** GitHub, Decorator-based Authorization, Role-Based Access Control (RBAC), CRUD Operations, MVT Architecture
- **Concepts:** Authentication & Authorization, Database Design, Backend Security

PROJECTS

Nova Banking System | Python, Django, MySQL | [GitHub](#)

- Built a full-featured banking management web application using Django and MySQL, implementing complete CRUD operations across Admin, Staff, and User modules.
- Designed and implemented a custom role-based authentication system from scratch (without Django's default auth), supporting three distinct access levels: Admin, Staff, and User.
- Enabled Admin to manage full system operations, Staff to handle account creation, fund transfers, and balance updates, and User to securely view balance and transaction history.
- Applied Django decorators for route-level authorization, enforcing access control across all views.
- Integrated MySQL for reliable, secure storage of account and transaction data, with queries optimized for accuracy and data integrity. [Link](#)

StarQueen Café Management System | Python, Django, MySQL | [GitHub](#)

- Built a full-stack cafe management web app enabling customers to browse the menu, reserve tables, view the gallery, and place home delivery orders.
- Designed database models for menu items, reservations, gallery images, delivery orders, and delivery areas using Django ORM.
- Implemented order tracking with unique order IDs, delivery area/pincode validation, and automatic delivery charge calculation.
- Used Django template inheritance, static/media file handling, and the messages framework to build a responsive, user-friendly interface.

EDUCATION

Bachelor of Science in Computer Science (B.Sc. CS) — CGPA: 8.69

B.P.H.E. Society's Ahmednagar College, Ahilyanagar — Savitribai Phule Pune University | 2026

CERTIFICATIONS

- Python Full Stack Developer Certification — Naresh i Technologies, Hyderabad (5-month program) [Link](#)
- Python Development Virtual Job Simulation — Deloitte (1-day virtual internship program) [Link](#)

ADDITIONAL INFORMATION

- **Strengths:** Quick Learner, Problem Solving, Team Collaboration
- **Languages Known:** English, Hindi, Marathi
