PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented Python Backend Developer with strong knowledge of Python, Django, REST APIs, and MySQL. Passionate about building secure and scalable backend applications. Developed a fully functional banking web application using Django, featuring role-based authentication, custom login systems, and complete database management. Eager to begin a professional career in backend development and committed to continuous learning and technical growth.

TECHNICAL SKILLS

Language: Python | **Framework:** Django | **API:** REST API | **Database:** MySQL | **Tools:** Postman

PROJECTS

Nova Banking System

Python | Django | MySQL

- Developed a banking management web application using Django and MySQL with full CRUD operations and a clean, user-friendly interface.
- Implemented a custom role-based authentication system with three modules — Admin, Staff, and User — built from scratch without Django's default authentication.
- Admin manages complete system operations; Staff handles account creation, fund transfers, and balance management; User module provides secure access to account balance and transaction history.
- Applied Django decorators for route-level authorization and integrated MySQL for reliable and secure transaction data storage.

EDUCATION

Bachelor of Science in Computer Science (B.Sc. CS)

Expected: 2026

B.P.H.E. Society's Ahmednagar College, Ahilyanagar — Savitribai Phule Pune University

CERTIFICATIONS

- Python Certification
